-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement filed September 18, 2006 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. The International search report, PCT/US87/01301, cited on the September 18, 2006 IDS has not been considered because no copy of the search report has been received.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5, 7, 8, 10, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Asterö (U.S. Pat. No. 4,339,175) in view of Rain (U.S. Pat. No. 4,022,522) and further in view of Capetta (U.S. Pat. No. 3,037,424). Asterö teaches a collapsible projection screen comprising a projection layer 1 formed of a flexible sheet of fabric and a flexible hoop 3 for supporting the projection layer in tension during use, wherein at least part of the tensioned

projection layer has a front projection surface 1 adapted to have an image projected thereon and a corresponding rear surface 2. Both the projection layer 1 and the backing layer 2 are within the hoop 3. Asterö does not teach that the fabric is a knitted fabric. Rain teaches in col. 3, lines 20-23 that it was known to use a woven/knitted fabric as the projection layer. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the features taught by Rain for the purpose of utilizing readily available materials. Using readily available materials reduces costs. Asterö teaches the salient features of the claimed invention except for a backing layer which absorbs light. Capetta teaches that it was known to provide a backing layer (layer V) to absorb light. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the features taught by Capetta for the purpose of improving contrast.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Asterö (U.S. Pat. No. 4,339,175) in view of Rain (U.S. Pat. No. 4,022,522) and Capetta (U.S. Pat. No. 3,037,424) as applied to claims 1-3, 5, 7, 8, 10, and 12 above, and further in view of Matsuda. Asterö in view of Rain and Capetta teaches the salient features of the claimed invention except for using a black coloration. Instead the combination teaches using a dark blue coloration. Matsuda teaches in col. 6, lines 56-58 that it was known to use a black colored pigment instead of a dark blue colored pigment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the features taught by Matsuda for the purpose of increased light absorption and/or different color correction.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Asterö (U.S. Pat. No. 4,339,175) in view of Rain (U.S. Pat. No. 4,022,522) and Capetta (U.S. Pat. No. 3,037,424)

Art Unit: 2862

as applied to claims 1-3, 5, 7, 8, 10, and 12 above, and further in view of Spector. Asterö in view of Rain and Capetta teaches the salient features of the claimed invention except for means for suspension. Spector teaches in figure 1, means for suspension 15 as an alternative to placing on the floor. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the features taught by Spector for the purpose of providing a raised display.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher E. Mahoney whose telephone number is (571) 272-2122. The examiner can normally be reached on 8:30AM-5PM, Monday-Thursday.
